Blue Lake Pole Bean

UCCS

Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

Delicious and flavorful -Great source of protein! Prefers full sun exposure: Heirloom Seed, Open Pollinated Seed, Organic Seed, Determinate, Dry Bean, Fava, Shell Bean, The Organic Broad Windsor is an old time heirloom, is one of the most revered fava beans available today. The pods of this plant produce one of the largest dry beans you'll find anywhere. The Broad Windsor can be used in a plethora of cuisines. The only fava bean endorsed by Dr. Hannibal Lecter, enjoy with a nice Chianti

Organic Fava Broad Windsor Bean

UCCS
Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

If you are tired of bending over to pick your bush beans, then the Blue Lake FM1K Pole Bean is for you! This reliable pole bean offers the high yield of a bush bean, but it easily climbs up poles, fences or trellises. Plus, it will yield much longer than a bush bean - right up to frost! Blue Lake FM1K Pole Beans' stringless pods grow to 6 inches and stay sweet and crisp even at maturity! Blue Lake FM1K Pole Beans are resistant to the bean common mosaic virus.

Brussels Sprouts, Long Island Cabbage

UCCS

Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

By far the most popular of the Brussels Sprouts, the Long Island Improved Brussels Sprout is an heirloom variety that's been producing delicious miniature-like cabbage heads for over 100 years! Great on your dinner table as an accompaniment to any meat or salad dish. Plant Long Island Improved Brussels Sprouts seeds in spring, summer, or fall - this is a very durable variety that can withstand cooler temperatures. The compact plant can grow up to 24 inches and will yield up to 100 sprouts over an extended period of time.

National Pickling Cucumber

Cucumber

UCCS

Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

National Pickling Cucumber is ideal for making dill pickles as it was actually bred to have a tapered shape to fit better into jars. However, this variety is also excellent for salads! National Pickling has a thin-skin allowing it to receive and capture pickling spices easily. Tender and delectable at any age - pick at 2-3 inches as a gherkin, 4 inches for fresh eating or to mature size to pickle.

Genovise Basil

Herb

UCES
Farm
UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

Though its name and its reputation are as Italian as it gets, many find it interesting that the cultivar we call Genovese Basil actually hails from Asia and North Africa, and then made its way north and west centuries ago. Genovese Basil today is considered by all to be the superior basil for making the tastiest pesto in the world.

Plant these Genovese Basil seeds in a sunny spot and enjoy a tasty harvest of one of the world's favorite herbs.

Green Arrow (Organic)

Pea

UCES

Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

Organic Green Arrow Pea is one of the true classic peas preferred by home gardeners in the USA and abroad. This delicious and versatile pea is resistant to most strains of disease that commonly affect pea crops, so therefore is an excellent choice for the no-hassle gardener. Organic Green Arrow is renowned for its generous yields of typically 10 peas per pod! An excellent pea variety for freezing.

Ancho or Poblano Pepper

UCES

Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

Grow heirloom peppers - Ancho or Poblano Pepper Seeds - 1,000-1,500
Scovilles: This heart shaped heirloom pepper is actually well known under two different names. "Poblano" is the fresh version and is excellent stuffed or roasted. "Ancho" is the dried version, often used in chili powder. Ancho / Poblano Pepper is a mild to medium chili pepper that is commonly used in Mexican cuisine, and other spicy dishes. It is the most commonly used variety for chili rellenos and mole.

Dr. Wyche's Yellow Tomato

Tomato

UCES
Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

Named after the late Dr. John Wyche who supposedly lived in the mountains and fertilized his garden with manure from a nearby zoo. Seeds for this variety were sent to Craig LeHoullier by John D. Green in 1992. Undoubtedly one of the best tasting yellow tomatoes to be found. An indeterminate heirloom that produces slightly flattened, smooth, 10-16 Oz., blemish-free, golden-yellow fruit with a meaty interior and few seeds. It's rich, sweet flavor and larger size sets this variety apart from other yellow heirlooms.

Tommy Toe

Tomato

UCES

Farm

UNIVERSITY OF COLORADO
COLORADO SPRINGS

General Information

Indeterminate - A cherry tomato with an attitude! The tommy toe tomato is one of the most vigorous fruiting tomatoes we have come across in a while. The plant puts out hundreds if not thousands of small 1 oz tomatoes that are perfectly round and blemish free. The plant also can tolerate heat stress better than any other tomato we have found. Delicious flavor, and a tight skin makes an addictive "pop" when you bite into them. Sweeter than candy and a hint of tomato acid makes these great for snacking.
